What to Recycle?

PAPER

Newspaper:

Stack newspapers in brown paper bags (please, no plastic bags which can't be recycled) or tie in bundles with string. Newspaper inserts are accepted. Magazines may or may not be inserted. Ask locally. Pass magazines onto others to be reused, otherwise bundle separately in weights less than 50 lbs.

White Ledger:

Copier, typing, mimeo, note and stationery paper that is non-glossy and free of plastic (no window envelopes). Place in a paper bag or deposit in box provided at the depot.

Computer Paper:

Computer paper, if separated from other white ledger, is a higher grade material. Please box or bag separately, marked "Computer".

Corrugated Cardboard and Paperboard:

Paperboard is gray or white non-corrugated cardboard, such as cereal and shoe boxes. Remove any plastic bag liners or cellophane windows. Cardboard and paperboard with wax or plastic coating such as milk cartons and ice cream containers are not accepted. Cardboard should be flattened and tied in bundles or stacked in a brown paper bag.

GLASS

Jars and bottles should be rinsed and caps removed. Colorless glass, green glass and brown glass should be separated and placed in the designated containers. **No** ceramics, plate glass, headlights, dishes, light bulbs, or Pyrex, please.

PLASTIC

We use many plastic containers in our households that can be recycled. Plastic made from the resin HDPE (high density polyethylene)such as milk, orange juice, cider and laundry detergent jugs, does not crack when flattened. These jugs should be rinsed, caps removed, and flattened. PET or PETE such as green and clear soft drink bottles are recyclable too.

HDPE

If your container has either of these codes imprinted on the bottom, then it's acceptable.

COMPOSTING

The simplest of the recycling process, composting can reduce our waste to be landfilled by 30%. Leaves, grass clippings, hay, garden remnants and kitchen scraps (no bones or meat) is a good recipe for compost. You can make compost in a bin (3' high by 3' wide works best) or you can build a pile on the ground at the edge of your garden. Layer the ingredients and sprinkle each with water and pack them down. Turn the mixture every three days to aerate and keep it moist.

CANS

Aluminum beverage cans and bitmetal/steel cans (such as soup cans) are 100% recyclable and should separated and placed curbside or taken to local drop-off center. It's not necessary to crush them.

OTHER MATERIALS

Depending upon the town in which you live, there are other recyclable materials that may be collected at curbside or accepted at town drop-off centers. These materials may include:

wood/brush grass clippings tires white goods (appliances)
metal scrap
motor oil
car batteries

rinted on recycled paper

Why RECYCLE

- Saves landfill space as landfills
- 🔊 Reduces environmenta
- 🖔 Conserves raw materic
- 👺 Saves you money

Recycling Guidelin

- Every person, business a separate recyclables from *It's The Law!*
